DANNY GARZA

Sebring, FL 33872 ◆ (321) 408-3048 ◆ garzadanny0101@gmail.com

PROFESSIONAL SUMMARY

AI automation and workflow practitioner with independent consulting and project experience since 2023. Build practical systems that turn complex tasks into clear steps, useful tools, and repeatable handoffs.
Work across ChatGPT, OpenAI, Codex, Google Workspace, CRM workflows, webhooks, REST APIs, and Python-supported tracking utilities.
Design structured prompts, agent workflows, knowledge-base organization, and human review points. Translate business goals into process maps, operating procedures, and documentation that non-technical users can follow.
Use AI-assisted development to build websites, applications, and workflow prototypes. GitHub work includes a Node.js opportunity dashboard with API routes, JSON storage, CSV export, and scoring tests.
Bring hands-on service operations experience from supervising event teams, coordinating VIP transportation, adapting staffing, and resolving customer concerns under time pressure.
Continue developing skills through coursework in agentic AI, LangChain, OpenAI APIs, prompt engineering, automation, and business analysis. Focus on work that is understandable, reviewable, and useful.

SKILLS

AI & Automation: ChatGPT, OpenAI, Codex, structured prompts, agent workflows, LangChain fundamentals
Integrations: REST APIs, webhooks, Google Sheets, Python utilities, JSON, data cleanup
Documentation: Intake forms, evidence checklists, issue tracking, reusable templates, process maps
Workflow analysis
Prompt design
Implementation planning
Website development
Business research
Human review checkpoints
Task prioritization
Customer issue resolution
Risk identification
Exception handling
Problem decomposition
Project organization
Requirements clarification
Platforms: GoHighLevel, Google Workspace, CRM pipelines, SMS/email sequences, calendar workflows
Business Operations: Lead follow-up, missed-call response, appointment reminders, SOPs and handoffs
Development: AI-assisted coding, Node.js, JavaScript, HTML/CSS, dashboards, GitHub
Team supervision
Data organization
Customer communication
Scoring logic review
Event coordination
Portfolio development
Process improvement
Research synthesis
Technical documentation
Clear written communication
Follow-up workflows
Reporting handoffs
Tool evaluation

EXPERIENCE

AI Consultant | Agentic AI Operations, 2023 - Current
Freelancer | Contract

- Created intake forms, evidence checklists, process maps, and communication templates for administrative workflows.
- Organized documentation around source records, issue tracking, and repeatable review steps.
- Turned complex administrative tasks into templates and instructions for non-technical users.
- Designed ChatGPT and OpenAI prompt workflows to support research, documentation, and decision-making.
- Reviewed operational information to identify workflow gaps and follow-up needs.

- Built decision-support frameworks using structured prompts, reference material, and human review.
- Developed implementation roadmaps that connect business requirements with practical AI use cases.
- Mapped where AI could support existing workflows and where human judgment was needed.
- Compared emerging tools against the task, user needs, and available resources.
- Created reusable documentation for consistent execution across recurring tasks.
- Adapted templates and workflow instructions as requirements changed.
- Explained technical processes in plain language for users with different experience levels.
- Broke complex problems into smaller steps, alternatives, and reviewable decisions.
- Applied new AI tools through hands-on projects and iterative workflow design.
- Reviewed operating procedures to identify unclear steps and duplicated effort.
- Assessed workflow, communication, and resource-use issues before proposing changes.

AI Workflow Consultant | Custom Frameworks, 02/2023 - Current
Self-employed – Titusville, FL

- Designed multi-step AI orchestration frameworks with task routing, specialist roles, challenger reviews, feedback loops, and organized reference material. Used prompts and runbooks to make complex work easier to follow and review.
- Built Google Sheets and Python-supported tracking utilities for leads, conversation status, bookings, and operating dashboards.
- Produced SOPs, reusable templates, and user-facing documentation for non-technical users.
- Designed service-business workflows for missed calls, lead follow-up, CRM stages, appointment booking, and reporting handoffs.
- Used IDEs and AI coding tools to develop websites, applications, and workflow prototypes, including a Node.js and JavaScript dashboard.
- Built a dashboard prototype with API routes, JSON persistence, CSV export, and a weighted scoring model using estimated or manually entered inputs.
- Added scoring and routing test cases to the dashboard project; documented the limits of its sample data and planned integrations.
- Developed a project-scoped task and result handoff system with persistent state and an MCP interface for AI-assisted workflows.

Valet Supervisor, 03/2020 - 07/2024
Accurate Event Services – Pompano Beach, FL

- Supervised valet and security teams at major events, including the International Polo Club, SunFest, and the South Florida Fair; coordinated vehicle handling, hospitality, and VIP service.
- Adjusted traffic flow, VIP shuttle operations, and staff training for changing crowds, schedules, and safety needs.
- Coordinated staffing schedules and team assignments during peak event periods.
- Monitored team performance and customer concerns to identify service and process improvements.

EDUCATION

Technology Education Coursework — No Degree
Wellington High School - Wellington, FL

- Using OpenAI APIs: Exploring APIs with the OpenAI Playground, 2026-04-19
- AI in IT Automation: Integrating AI Automation in IT Operations, 2026-04-19
- Using OpenAI APIs: Fine-tuning Models, the Assistants API, & Embeddings, 2026-04-19
- Getting Started with Prompt Engineering, 2026-04-19
- BABOK v3: Introduction to Business Analysis, 2026-04-19
- Exploring Prompt Engineering Techniques, 2026-04-19
- AI-Powered Productivity: Generative AI Bootcamp, 2026-04-19

WORKFLOW APPROACH

Start with the business problem, map the process, and choose tools that fit the task. Build structured prompts, define inputs and outputs, organize reference material, and include human review. Document exceptions and handoffs so the next person can use the workflow. Distinguish a prototype from a deployed system and estimated inputs from observed results.

SELECTED PROJECTS

- Missed-Call Rescue Workflow Prototype: Designed a service-business flow for text-back messages, lead qualification, booking links, CRM updates, and reporting handoff.
- Appointment Follow-Up System: Designed reminder, confirmation, reschedule, and exception paths for appointment operations, with SMS/email sequencing and calendar status rules.
- Opportunity Dashboard Prototype: Built a Node.js and JavaScript application with local API routes, JSON storage, CSV export, and scoring tests, using estimated or manually entered inputs.
- AI Prompt and Runbook Systems: Created reusable prompts and operating instructions for task routing, research, document preparation, output review, and human approval.

TARGET FIT

- AI Automation Specialist
- AI Workflow Builder
- Agentic AI Operations Support
- Operations Analyst
- AI Evaluation Support
- Customer Operations / CRM Support
- Process Documentation Specialist

PROFESSIONAL FOCUS

/s/ Danny Garza

AI Automation | Workflow Design | Operations
Practical AI systems, clear documentation, and hands-on implementation.
Portfolio and GitHub projects (if private, contact info below, and gladly provide access) show the workflows, tools, and deliverables behind the experience listed here.

COURSE COMPLETION CERTIFICATE PORTFOLIO
